Graduate Full-Stack Developer | Python & JavaScript | Django, React, SQL, Angular | AWS-Certified

PROFESSIONAL SUMMARY

Graduate Full-Stack Developer with commercial internship experience and multiple production-style projects delivering AWS-hosted web applications using Python and JavaScript. Built ERP modules, booking platforms and RESTful APIs with Django, React, SQL databases and CI/CD pipelines. Proven at translating business requirements into scalable solutions, collaborating in Agile teams, and shipping well-documented, tested code. AWS and Azure certified.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, SQL, HTML5, CSS3, C#, Bash

Front-End: React, Angular, JavaScript/TypeScript, Responsive UI, Accessibility Basics

Back-End: Django, Flask, Laravel, RESTful APIs, Node.js, JavaFX

Databases: MySQL, MongoDB, DynamoDB, AlloyDB, Cloud SQL, SQLite

Cloud & DevOps: AWS (EC2, RDS, VPC, Elastic Beanstalk), CI/CD Pipelines, Jenkins, Linux

Tools: Git, Bitbucket, Postman, Unity, Xcode

Practices: Agile (Scrum/Kanban), Secure Coding, Unit & Integration Testing, Debugging, Technical Documentation

Enterprise Systems: ERP Platforms, Business Process Modelling, Systems Integration

PROFESSIONAL EXPERIENCE

Wonder IT – Full-Stack Software Engineer

Jan 2026 – Present

Sydney, NSW, Australia

- Designed and delivered AWS-hosted web applications using Laravel/Django on the back end and Angular/React on the front end, supporting 3+ internal systems used by client-facing teams.
- Built responsive, accessible user interfaces with JavaScript/TypeScript and implemented RESTful APIs in Python, PHP and Node.js to support core business workflows.
- Designed and maintained relational and NoSQL databases (MySQL, MongoDB, Cloud SQL), improving query performance and reporting reliability for operational dashboards.
- Integrated third-party APIs and enterprise platforms while contributing to Agile sprint cycles and system design discussions for new feature releases.
- Strengthened production stability through automated testing, secure coding practices and CI/CD pipelines using Git, Bitbucket and Jenkins, while supporting deployments on EC2, RDS and Elastic Beanstalk.

Four Star International Ltd. – Web Developer

Jun 2022 – Dec 2022

West Bengal, India

- Enhanced and maintained internal web systems supporting daily operations for 20+ staff, improving data retrieval times by approximately 30%.
- Implemented role-based authentication and access-control workflows, strengthening application security and reducing unauthorised access risks.
- Supported deployments and production troubleshooting across recurring system issues by roughly 25%.
- Authored technical documentation that reduced onboarding time for new developers and support staff.

P.N Composite Ltd. – Software Developer / IT Intern

Jul 2021 – Jul 2022

Dhaka, Bangladesh

- Led development of a full-featured e-commerce website across 10+ pages, owning both front-end and back-end delivery.
- Designed responsive UI/UX using HTML, CSS and JavaScript that improved engagement among younger users and supported customer acquisition.
- Built SQL-backed systems to manage products, orders and reporting while optimising performance to reduce page-load times by approximately 25%.
- Partnered with marketing and operations teams via Git-based workflows to ship iterative releases and documentation.

PROJECTS

AWS Cloud-Based LAMP Stack Deployment

Apr 2025 – May 2025

- Architected multi-AZ cloud infrastructure on AWS using VPC, EC2, RDS and Load Balancers.
- Implemented security groups, SSH access and auto-scaling; via Elastic Beanstalk with CI/CD-style workflows.
- Delivered infrastructure under budget and performance constraints while meeting availability requirements.

Realtors – Full-Stack Property Booking Platform (Django, SQLite)

Feb 2024 – Apr 2024

- Built secure authentication, booking workflows, admin CRUD features and notifications.
- Achieved 98% unit test coverage and maintained sub-500ms page response times.

Enterprise Systems Developer – ERP Platform (Textile Domain)

Academic Industry Project

- Analysed ERP workflows across inventory, procurement and production tracking and translated requirements into functional modules.
- Delivered database-backed features and system documentation for operational handover.

Data Analytics in Cybersecurity – Intrusion Detection (Python) • Processed datasets using pandas and built anomaly-detection models in scikit-learn. • Reported evaluation metrics for proactive threat detection use cases.	Mar 2025 – May 2025
iOS Task Manager App (Swift, CoreData) • Developed CRUD task flows, CoreData persistence and notifications in Xcode.	Mar 2024 – May 2024
Unity Game Suite (C#) • Created three interactive 2D games using modular OOP, collision detection and animation systems.	Aug 2023 – Oct 2023

EDUCATION

University of Technology Sydney (UTS)
Bachelor of Science in Information Technology – Major: Enterprise Management Systems | Grade: Distinction

CERTIFICATIONS

AWS Certified Cloud Practitioner
Microsoft Certified: Azure Fundamentals
CompTIA IT Fundamentals (ITF+)
Microsoft AI Skills for Students

ADDITIONAL EXPERIENCE

Brand Influence Group (BIG) – Merchandiser	Sep 2024 – Present
Coles Supermarket – Customer Service / Christmas Casual	Jul 2024 – Sep 2024
